Professional Summary

Computer Science undergraduate with hands-on experience in backend and full-stack development using Node.js, Django, MongoDB, and PostgreSQL. Proven open-source contributor and project maintainer with experience in CI/CD, API development, and scalable application architecture. Actively seeking Software Engineering Internship or Entry-Level Backend roles.

Education

Bengal College of Engineering and Technology

Aug 2023 – June 2027

B.Tech in Computer Science

- CGPA: 7.0 / 10.0
- **Coursework:** Computer Architecture, Algorithms, Data Structures, Theory of Computation, Object Oriented Programming, Operating Systems, Discrete Mathematics

Technical Skills

Programming Languages: C, C++, Java, Python, JavaScript, TypeScript, SQL

Backend Technologies: Node.js, Express.js, Django, REST APIs

Frontend Technologies: React.js, Next.js, Tailwind CSS

Databases: MongoDB, PostgreSQL

DevOps I& Tools: Docker, Git, GitHub Actions, CI/CD

Libraries I& Frameworks: NumPy

Experience

Open Source Maintainer / Project Admin — GSSOC'24

Remote, India

Oct 2024 – Nov 2024

Oct 2024 – Nov 2024

- Maintained and scaled an open-source web application with 50+ active contributors during GSSOC.
- Reviewed, merged, and managed 50+ pull requests using Git and GitHub, ensuring code quality and stability.
- Resolved deployment, CI/CD, and merge conflict issues, maintaining 100% application uptime.
- Guided contributors on React.js, Node.js, and Git best practices, improving documentation and maintainability.

Projects

Open Source Counter App

[Live](#) [Github](#)

- Architected an open-source React application that attracted **50+ active contributors** during GSSOC.
- Orchestrated the project roadmap, reviewing code submissions and implementing GitHub Actions for CI/CD.
- *Tech Stack:* React, Node.js, MongoDB, GitHub API.

Personal Portfolio

[Live](#) [Github](#)

- Designed my personal portfolio to showcase my projects and made it available live via deployment
- Tech Stack: NextJs, Turborepo, ShadCN UI, TailwindCSS, Framer Motion

To-Do Application

[Live](#) [Github](#)

- Developed a CRUD-based task management system using Node.js, MongoDB, and React.

- Implemented REST APIs for task creation, deletion, and retrieval.
- Applied MVC architecture and optimized database queries for performance.
